U.S. Senate Committees & Federal Officials Alerted

Reflected below are the Senate Committees and Federal Officials who are being concurrently apprised of this assault on core American Citizens' rights – the result of yet another intolerable affront on the American public by the U.S. Banking industry, made possible by rampant corruption among local judicial staff and an astonishing number of attorneys.

Important note: Most of the officials listed above have established bureaucracies effective at deflecting nonsensical ho-hum communications from the general public; however, they also end up frustrating and discouraging those who wish to alert them of legitimate issues that warrant their attention. For example, the FDIC's response to being alerted of this fraud could not have been more feckless and vapid, and although earlier requests were made to bring this to the attention of Sheila Bair, I received no indication this was ever done.

Robert Mueller and many other senior FBI officials have received dozens of communiqués evidencing a fraud of epic proportion was being perpetrated (where this indictment represents only the “tip of the iceberg”); however, the responses to date indicated Mr. Mueller has NEVER been advised of this – and the responses to date are best described as disturbing, nonresponsive and thoroughly disappointing.

And trying to alert Mr. Holder to the astonishing level of observed and painstakingly documented instances of corruption among judges and attorneys in the triangle region of North Carolina alone is a sure-fire exercise in futility. I suggest you disguise your voice and call in yourself for a vexing run-around of a lifetime. Although my IQ is measured to be in the top 1%, I don't seem to be smart enough to figure this out – ergo, you NEED to change this.

Given the aforesaid, an unorthodox and multifaceted approach has been undertaken to ensure you ALL know about this, so you may hopefully timely respond in a “YES WE CAN” manner.
